

Scenario 3

Student Gorgy is 15 years old; he is from Russia but he has lived all his life in a small town in Central Spain. His family owns a mini market which is situated near Gorgy's school. Until now Gorgy has had a normal life. School, friends, helping his family at the mini market, he is considered as a lovely kid by neighbors and teachers alike. Additionally, students and neighbors are the basic clients of the mini market. During the pandemic period Gorgy's mother was infected with coronavirus. Fortunately, she only experienced lack of taste and nothing else. Her family decided to announce mother's infection via social media. Also, for 14 days all the family stayed at home and the mini market opened with the help of a new employee. After that, all the members of the family were tested for coronavirus. The results were negative and they got back to work and school. The problem is that that during the first 14 days of mother's illness very few clients went to the mini market because they were afraid of getting infected. This situation continued and two months later the problem still exists with most people avoiding going to the mini market.

Q1: Do you think that Gorgy's family handled the problem in a wrong way?

Q2: Do you think that they had to keep the illness a secret?

Q3: Do you think that in this occasion we have a bullying situation?

Q4: Do you think that in this situation Gorgy's nationality is important?

Q5: If you were Gorgy's neighbor would you go to the mini market in the first place? If not, would you shop there after the 14 day quarantine period?

Q6: What do you think that Gorgy and his family have to do to change the situation?

Q7: How do you think Gorgy feels?
